

Where Does Computer Science Fit Into My Classroom?

Computer Science (CS) isn't just about coding. CS Is about thinking creatively, solving problems, and helping students understand the world around them. Every educator, in every subject, can help students build these skills.

CS Is For Everyone

- Every student deserves the chance to explore how technology shapes their world
- CS builds persistence, collaboration, and communication skills, all essential in all subjects
- You don't have to be an expert to get started!

CS Connects Across Subjects

Subject	How CS Can Fit
Math	Logical thinking, pattern recognition, algorithms
ELA	Sequencing, storytelling, following directions
Science	Data collection, modeling, experimentation
Social Studies	Explore history through innovation, impacts of technology
Art & Mysic	Patterns, design, and creative expression

Start Small – One Activity at a Time!
